DETAILED ACTION

Drawings

1. The following changes to the drawings have been approved by the examiner and agreed upon by applicant: Figure 3 has been amended to include the reference character " σ_T " as described on page 3, lines 6. Figures 1-3 have been amended to include the legend --Prior Art-- because only that which is old is illustrated, and FIG. 5 has been relabeled FIG. 5(a)-5(e) to comply with the draftperson's objection to the drawings. In order to avoid abandonment of the application, applicant must make these above agreed upon drawing changes.
2. The changes to the drawings required to overcome minor objections to the drawings, and were authorized in a telephone conversation with Mr. R. Gnuse on January 20, 1999.

INFORMATION ON HOW TO EFFECT DRAWING CHANGES

1. **Correction of Informalities** -- 37 CFR 1.85; 1097 O.G. 36

New formal drawings must be filed with the changes incorporated therein. The art unit number, application number (including series code) and number of drawing sheets should be written on the reverse side of the drawings. Applicant may delay filing of the new drawings until receipt of the "Notice of Allowability" (PTOL-37 or PTO-37). If delayed, the new drawings **MUST** be filed within the **THREE MONTH** shortened statutory period set for reply in the "Notice of Allowability" to avoid extension of time fees. Extensions of time may be obtained under the provisions of 37 CFR 1.136(a) for filing the corrected drawings (but not for payment of the issue fee). The drawings should be filed as a separate paper with a transmittal letter addressed to the Official Draftsperson.

Art Unit: 2875

2. Corrections other than Informalities Noted by Draftsperson on form PTO-948.

All changes to the drawings, other than informalities noted by the Draftsperson, **MUST** be made in the same manner as above except that, normally, a highlighted (preferably red ink) sketch of the changes to be incorporated into the new drawings **MUST** be approved by the examiner before the application will be allowed. No changes will be permitted to be made, other than correction of informalities, unless the examiner has approved the proposed changes.

Timing of Corrections

Applicant is required to submit acceptable corrected drawings within the three month shortened statutory period set in the "Notice of Allowability" (PTO-37). Within that three month period, two weeks should be allowed for review of the new drawings by the Office. If a correction is determined to be unacceptable by the Office, applicant must arrange to have an acceptable correction re-submitted within the original three month period to avoid the necessity of obtaining an extension of time with extension fees. Therefore, applicant should file corrected drawings as soon as possible.

Failure to take corrective action within the set (or extended) period will result in **ABANDONMENT** of the application.

Examiner's Reasons for Allowance

3. The following is an examiner's statement of reasons for allowance: The prior art of record neither shows nor suggests a glass bulb for a cathode ray tube comprising: a panel portion with a face portion of substantially rectangular shape, and a skirt portion forming a side wall for the face portion, a funnel portion, and a neck portion, wherein a compressive stress is formed in at least an outer surface of the panel portion by physical strengthening; there is a relation of $1.0 \leq t_R/t_F \leq 1.4$ between the maximum wall thickness t_F of the face portion on at least one axis of a long axis and a

Art Unit: 2875

short axis which pass through the center of the face portion and which cross at a right angle, and the maximum wall thickness t_R of a blend R portion for connecting the skirt portion; and a formula of $7 \text{ MPa} \leq |\sigma_C| \leq 30 \text{ MPa}$ is satisfied where σ_C is a compressive stress value by physical strengthening in at least an area including a position at which the maximum tensile vacuum stress $\sigma_{V_{\max}}$ is formed after assembling of the cathode ray tube, substantially as shown in the figures, and described in the specification. The glass bulb having the subject claimed maximum wall thickness t_F of the face portion on at least one axis of a long axis and a short axis which pass through the center of the face portion and which cross at a right angle, and the maximum wall thickness t_R of a blend R portion for connecting the skirt portion provides control in cooling of the glass bulb while the compressive stress is formed in at least the outer surface of the panel portion.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Examiner's Amendment

4. An Examiner's Amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 C.F.R. § 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the Issue Fee.

Art Unit: 2875

5. On page 10, line 14, the phrase "Figure 5 is a diagram" has been changed to --Figure 5a-5e are diagrams--.

6. In claim 1, line 5, the phrase [is formed at at least an outer surface] has been changed to is formed in at least an outer surface.

7. The changes to claim 1, and to the specification, were required to overcome respective minor objections, and were authorized in a telephone conversation with Mr. R. Gnuse on January 20, 1999.

8. Pursuant to MPEP § 606.01, the title has been changed follows:
--STRENGTHENED GLASS BULB FOR A CATHODE RAY TUBE--

Allowable Subject Matter

9. Claims 1-6 are allowed over the prior art of record.

10. Since allowable subject matter has been indicated, applicant is encouraged to submit formal drawings in response to this Office action. The early submission of formal drawings will permit the Office to review the drawings for acceptability and to resolve any informalities

Art Unit: 2875

remaining therein before the application is passed to issue. This will avoid possible delays in the issue process.

Conclusion

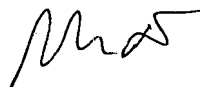

11. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

12. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Day whose telephone number is 703/305-4941. The examiner can normally be reached on Monday-Friday, from 8:00 A.M. to 5:00 P.M.
